### About SSPS

Sai Surya Professional Services Pvt. Ltd. (SSPS) started in 2005 in India to design and deliver technology-based IT solutions to help companies do what they do best. It provides a range of services by leveraging domain, business expertise and strategic alliances with leading technology providers. Sai Surya's service offerings span ISV Services, application services, offshore product development, custom software development, maintenance and re-engineering, web hosting and business process outsourcing. We have our development center in India and business office in US with over 40 employees covering various technologies.

SSPS conceptualized and deployed solutions in various vertical segments covering Agriculture, food processing, construction and Transportation industries. Its solutions create rapid return on investment, new and better ways of working and bottom-line impact. SSPS designs, delivers and manages business systems that increase security, productivity and customer satisfaction. It is business without barriers - linking information, people, processes and technologies to operate more effectively across projects and organisations. Business without barriers means having all of your people, assets, and technology working as one - laying the foundation for collaboration, innovation, and success.

### About CIRCOT

The Central Institute for Research on Cotton Technology (CIRCOT), Mumbai, established in the year 1924, at Mumbai, Maharashtra, is a unit under the Division of Agricultural Engineering of the Indian Council of Agricultural Research (Department of Agricultural Research and Education, Ministry of Agriculture, Government of India) engaged in research and development activities in cotton technology. CIRCOT had setup Ginning Training Centre at Nagpur in 1985 to facilitate research and training in the area of ginning technology. The GTC, Nagpur is having ultra modern ginning machinery, fibre testing equipments and by-products utilization plants for production of particle boards and scientific seed processing plant.

The research and development activities undertaken by CIRCOT in the area of ginning and its visionary approach has resulted in transforming the Indian ginning industry to world class in terms of the infrastructure facilities.

### About GINERP Software

GINERP Software Solution is a user-friendly ERP management system for the Cotton Ginning and pressing Industry, which brings enormous efficiency and value addition to the customers in the face of the stringent guidelines of the Government of India. The voluminous and redundant book-keeping and the stiff competition in the Cotton Ginning industry.

The solution incorporates a wide range of modules, which support activities such as: Administration, Weighment, Sample Test Reports, Payroll Management, Finance Management (General Ledger), Inventory Control, Barcode Management, Purchase & Logistics, Sales & Distribution, Production - Cotton Ginning Processing & Pressing Processing, Machinery Maintenance, Bale Management, Statutory Reports, Tax Reports, etc., It follows all guidelines of the Government and reduces paper work by up to 90%.
